Chapter 1

National

1.1 Cases over time

As at 2023-03-23, there were 7570 cases reported nationally.

This is shown in the graph below:

1.2 Demographic distribution

The stratification of these cases by age and sex is as shown:

1.3 Spatial distribution

The spatial distribution of these cases at subcounty level is as shown:

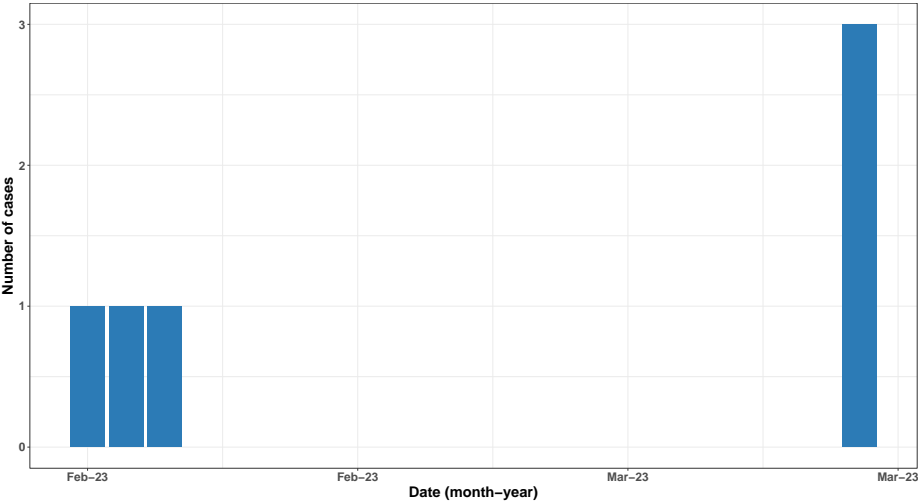

Chapter 2

Bomet

2.1 Cases over time

As at 2023-03-23, there were 6 cases reported in Bomet County.

This is shown in the graph below:

2.2 Demographic distribution

The stratification of these cases by age and sex is as shown:

2.3 Spatial distribution

The spatial distribution of these cases at subcounty level is as shown:

Chapter 3

Garissa

3.1 Cases over time

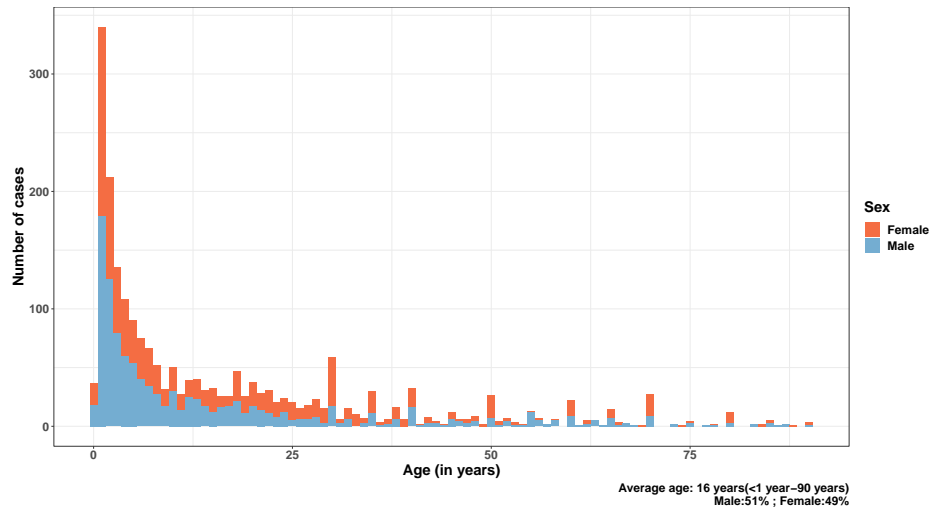

As at 2023-03-23, there were 2163 cases reported in Garissa County.

This is shown in the graph below:

3.2 Demographic distribution

The stratification of these cases by age and sex is as shown:

3.3 Spatial distribution

The spatial distribution of these cases at subcounty level is as shown:

Chapter 4

Homa Bay

4.1 Cases over time

As at 2023-03-23, there were 51 cases reported in Homa Bay County.

This is shown in the graph below:

4.2 Demographic distribution

The stratification of these cases by age and sex is as shown:

4.3 Spatial distribution

The spatial distribution of these cases at subcounty level is as shown:

Chapter 5

Kajiado

5.1 Cases over time

As at 2023-03-23, there were 231 cases reported in Kajiado County.

This is shown in the graph below:

5.2 Demographic distribution

The stratification of these cases by age and sex is as shown:

5.3 Spatial distribution

The spatial distribution of these cases at subcounty level is as shown:

Chapter 6

Kiambu

6.1 Cases over time

As at 2023-03-23, there were 402 cases reported in Kiambu County.

This is shown in the graph below:

6.2 Demographic distribution

The stratification of these cases by age and sex is as shown:

6.3 Spatial distribution

The spatial distribution of these cases at subcounty level is as shown:

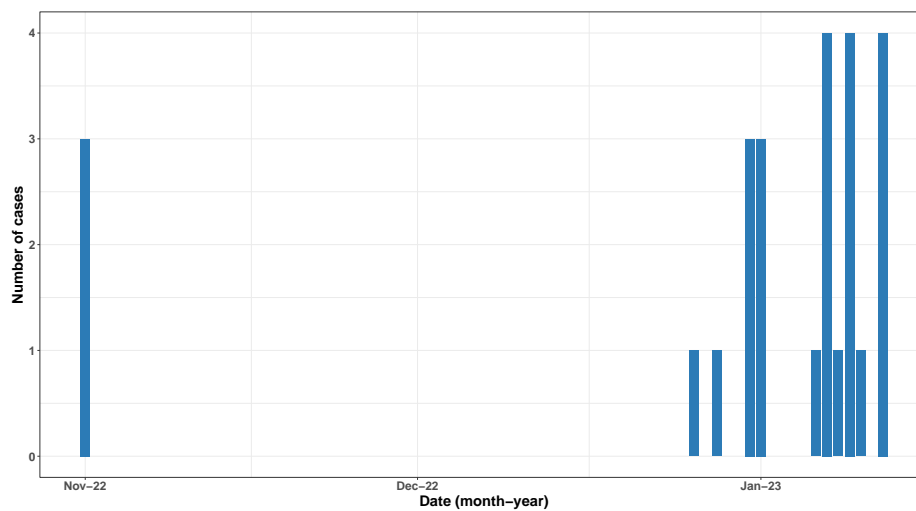

Chapter 7

Kitui

7.1 Cases over time

As at 2023-03-23, there were 26 cases reported in Kitui County.

This is shown in the graph below:

7.2 Demographic distribution

The stratification of these cases by age and sex is as shown:

7.3 Spatial distribution

The spatial distribution of these cases at subcounty level is as shown:

Chapter 8

Machakos

8.1 Cases over time

As at 2023-03-23, there were 352 cases reported in Machakos County.

This is shown in the graph below:

8.2 Demographic distribution

The stratification of these cases by age and sex is as shown:

8.3 Spatial distribution

The spatial distribution of these cases at subcounty level is as shown:

Chapter 9

Mandera

9.1 Cases over time

As at 2023-03-23, there were 1464 cases reported in Mandera County.

This is shown in the graph below:

9.2 Demographic distribution

The stratification of these cases by age and sex is as shown:

9.3 Spatial distribution

The spatial distribution of these cases at subcounty level is as shown:

Chapter 10

Meru

10.1 Cases over time

As at 2023-03-23, there were 85 cases reported in Meru County.

This is shown in the graph below:

10.2 Demographic distribution

The stratification of these cases by age and sex is as shown:

10.3 Spatial distribution

The spatial distribution of these cases at subcounty level is as shown:

Chapter 11

Murang'a

11.1 Cases over time

As at 2023-03-23, there were 43 cases reported in Murang'a County.

This is shown in the graph below:

11.2 Demographic distribution

The stratification of these cases by age and sex is as shown:

11.3 Spatial distribution

The spatial distribution of these cases at subcounty level is as shown:

Chapter 12

Nairobi

12.1 Cases over time

As at 2023-03-23, there were 1186 cases reported in Nairobi County.

This is shown in the graph below:

12.2 Demographic distribution

The stratification of these cases by age and sex is as shown:

12.3 Spatial distribution

The spatial distribution of these cases at subcounty level is as shown:

Chapter 13

Nakuru

13.1 Cases over time

As at 2023-03-23, there were 13 cases reported in Nakuru County.

This is shown in the graph below:

13.2 Demographic distribution

The stratification of these cases by age and sex is as shown:

13.3 Spatial distribution

The spatial distribution of these cases at subcounty level is as shown:

Chapter 14

Nyeri

14.1 Cases over time

As at 2023-03-23, there were 55 cases reported in Nyeri County.

This is shown in the graph below:

14.2 Demographic distribution

The stratification of these cases by age and sex is as shown:

14.3 Spatial distribution

The spatial distribution of these cases at subcounty level is as shown:

Chapter 15

Tana River

15.1 Cases over time

As at 2023-03-23, there were 762 cases reported in Tana River County.

This is shown in the graph below:

15.2 Demographic distribution

The stratification of these cases by age and sex is as shown:

15.3 Spatial distribution

The spatial distribution of these cases at subcounty level is as shown:

Chapter 16

Uasin Gishu

16.1 Cases over time

As at 2023-03-23, there were 8 cases reported in Uasin Gishu County.

This is shown in the graph below:

16.2 Demographic distribution

The stratification of these cases by age and sex is as shown:

16.3 Spatial distribution

The spatial distribution of these cases at subcounty level is as shown:

Chapter 17

Wajir

17.1 Cases over time

As at 2023-03-23, there were 654 cases reported in Wajir County.

This is shown in the graph below:

17.2 Demographic distribution

The stratification of these cases by age and sex is as shown:

17.3 Spatial distribution

The spatial distribution of these cases at subcounty level is as shown:

Chapter 18

West Pokot

18.1 Cases over time

As at 2023-03-23, there were 16 cases reported in West Pokot County.

This is shown in the graph below:

18.2 Demographic distribution

The stratification of these cases by age and sex is as shown:

18.3 Spatial distribution

The spatial distribution of these cases at subcounty level is as shown:
